

Advice on Digital Learning in Higher Education

VLOR (Flemish Education Council), May 2014

Cis Van Den Bogaert, chairman of the Working Group on Digital Learning

Globalisation as the Challenge for HE in the 21st Century

Technology

VISUALIZING PROGRESS

If transistors were people

If the transistors in a microprocessor were represented by people, the following timeline gives an idea of the pace of Moore's Law.

Now imagine that those 1.3 billion people could fit onstage in the original music hall. That's the scale of Moore's Law.

Key Trends Accelerating HE Technologies

- Growing Ubiquity of Social Media
- Integration of Online, Hybrid and Collaborative Learning

Significant challenges Impeding HE

- Low digital fluency of faculty
- Relative lack of rewards for teaching

Developments in Educational Technology

- Flipped classroom
- Learning analytics

Recommendations

Strategic Framework

- Vision and Policy
 - Vision on digital learning
 - Flemish Action Plan in line with European Agenda
 - A Flemish Platform for Educational Technologies
- Financing
- Accreditation and APEL
- OER

Teaching and Learning

- Digital competences in the curriculum
- DL as an opportunity for democratisation
- DL as a pillar of internationalisation
- Digitally literate teachers: a prerequisite
- Quality design of digital learning
- The campus as a powerful digital learning environment

How To Move Forward In Flanders?

- Further consultation is needed
 - but don't waste time in an umpteenth ad hoc working group
- Look for a partnership with a strategic policy and research centre
 - good practice: Mediawijs.be

Final Consideration

Organizations are better than individuals when it comes to avoiding errors, because they naturally think more slowly and have the power to impose orderly procedures.
